SWI Diagnostics is a South Carolina based ancillary service provider offering mobile ultrasound scanning to physician offices and clinics throughout the Lowcountry. We have combined our years of experience and clinical expertise to bring the very latest in digital ultrasound services to our medical community. We've assembled a team of highly qualified sonographers and experienced physicians specializing in the interpretation of ultrasound procedures. Currently, SWI Diagnostic's mobile ultrasound service travels to Charleston, Colleton, Berkeley, and Dorchester counties. The patients in these areas may now have their ultrasound exams coordinated with their regular doctor's visit, in the comfort and convenience of familiar surroundings

Our mobile units present a wide array of ultrasound procedures utilizing state-of-the-art equipment, performed by registered, experienced technicians. Services areas include general, obstetric, abdominal, and vascular ultrasound. We perform testing procedures for our clients on-site at nursing facilities, physician offices, and clinics with equipment and technologists that come directly to the patient in the comfort and convenience of familiar surroundings. We take the time to understand your individual practice needs and we offer flexible solutions designed to exceed them. Count on SWI for the very best in state of the art technology, service that is prompt and reliable, and delivery that is compassionate and professional. Our mobile services offer your practice:

Highly Trained and Registered Sonographers:

Because we offer a flexible schedule and unique benefits, SWI Diagnostics is able to recruit and retain the very best Sonographers. We employ only ARDMS registered professional with clinical expertise you can count on.

Flexible Solutions:

We offer a variety of billing programs and options, and are always willing to work with you, your staff, and your patients to customize a program that meets the needs of your specific practice. Some examples are included below:

If we provide our equipment and personnel:

- We can bill patients and/or their insurance carrier directly and compensate you daily for space rental
- We can bill your practice a flat rate per study fee - usually 85% of the Medicare allowable. You in turn bill the patient and/or their insurance carrier. Medicare classifies this as a purchased service. Your practice keeps the difference between our fee and what you recover from the patient or their insurance carrier.

If you or a colleague are qualified to do your own interpretations, we bill the technical component only, and your practice can bill the professional component.

If we provide personnel only, full day and half day rates are available and are billed directly to your practice.
